### **DETAILED ACTION**

1. Claims 1-3 are presented for examination.
2. The abstract of the disclosure is objected to because of the word "invention". Correction is required. See MPEP § 608.01(b).

Figures 9 and 10 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by admitted prior art Takenaka (U.S. Pat. No. 6,301,524).
5. As per claim 1, **Takenaka** teaches gait pattern generating device of a walking robot for generating a gait pattern from a desired ZMP trajectory using ZMP preview information (see col. 7, lines 7-33), wherein a driving quantity of the center of gravity in one moment is determined on the basis of a fed-back motion state of the center of gravity in the moment and a previewed or

planned future ZMP trajectory, so as to generate a walking motion in real time (see col. 6, 38-51 and abstract).

As per claim 2, **Takenaka** teaches gait pattern generating device of a walking robot using ZMP preview information wherein the walking robot is a bipedal walking robot (see col. 42-53).

As per claim 3, **Takenaka** teaches gait pattern generating device of a walking robot using ZMP preview information, wherein the previewed or planned future ZMP trajectory is corrected based on a detailed dynamical model of the robot in addition to a basic model (see abstract and col. 24, lines 19-27).
